**DIGIT VALUE** is searching for a **System and virtualisation Engineer**

**Code: MON SYVIR 0718\_01**

**Place: Monaco**

### **Description**

You are a talent of digital technologies, searching for a job opportunity in PACA (Provence-Alpes-Côte d'Azur). We are searching for a systems and virtualization engineer to join a team whose main objective is the industrialization and maintenance of the company's virtualization infrastructures.

### **Main tasks:**

- Implement VMware's Vcloud Suite Infrastructure for Collaborative Infrastructure (Exchange, Skype for Business, One Drive, Mobility Mobile Iron MDM)
- Industrialize VMware Platforms with Vrealize Suite (Operation, Orchestrator, NSX)
- Define virtual machines to industrialize the processes of "Delivery"
- Systems administration
- Consolidate VMware platforms with Veeam backup tools
- Understand context and scope (Analysis of existing documents and information related to infrastructure administration)
- Participate in meetings to clarify the specificities of the covered scope
- Execute planned tasks related to the administration of assets in compliance with operational commitments
- Participate in setting up automation and monitoring tools for VMWARE environments in the IAAS PAAS perimeter
- Feed the various tools in the scope of updating CMDB, GLPI, etc.
- Update VMware Linux, Windows and Appliance servers mapping and all Level 1, 2 and 3 operational documents
- Participate in operational monitoring meetings (Operations, CAB-Change Advisory Board...)
- Write technical implementation specifications of the various administration tools
- Work closely with supervisory and security teams and architects in BUILD phases
- Document and present the solutions before going into production.

**Gross annual salary:** 45k€ - 55k€, depending on previous experience on the role

### **Personal profile**

- Engineering degree (or equivalent) in Computer Science or related technical field
- Autonomous, rigorous, responsible, proactive, flexible, good relational skills and teamwork

**Skills**

- VMware's Vcloud Suite, Collaborative Infrastructure (Exchange, Skype for Business, One Drive, Mobility Mobile Iron MDM)
- Industrialize VMware Platforms with Vrealize Suite (Operation, Orchestrator, NSX), Citrix

**Type of contract**

Permanent Contract

**Place**

Monaco (Principality of Monaco)
